Role Description – Data Analyst Intern

About Us:
Battery Smart is India's largest and fastest-growing battery-swapping network for electric two and three-wheelers. Founded in 2019 and launched in 2020, we are transforming the EV sector by making electric mobility accessible, economical, and scalable through a unique partner-led model. Today, we power the journeys of over 90,000+ drivers daily through 1,600+ swap stations across India.

Role Overview:
As a Data Analyst Intern at Battery Smart, you will support data-driven decision-making across our fast-growing EV ecosystem. You will assist in collecting, analyzing, and interpreting operational and business data to help generate meaningful insights. Working closely with the Strategy, Operations, and Product teams, you will contribute to identifying growth opportunities, optimizing station performance, and enhancing the driver experience through analytics and reporting. Your work will play a key role in supporting Battery Smart's mission of making electric mobility accessible and affordable for all.

Key Responsibilities:
• Assist in analyzing operational data to identify trends and insights.
• Support the development and maintenance of dashboards and reports for business decision-making.
• Collaborate with cross-functional teams to improve efficiency and streamline processes.
• Help define KPIs and track performance against goals.
• Provide preliminary data-driven observations to support business improvements.
• Work with IoT and geospatial data under guidance to help optimize operational performance.

Required Skills & Qualifications:
• Pursuing a Bachelor's degree in Business, Statistics, Engineering, Data Science, or a related field.
• Basic proficiency in SQL, Excel, Python, and data visualization tools (e.g., Tableau, Power BI).
• Strong analytical and problem-solving mindset.
• Good communication skills with the ability to present findings clearly.
• Curiosity, eagerness to learn, and the ability to work in a fast-paced environment.
